

Hwacheon Hi-Eco 21 HS — Bearkat Blur

High-speed CNC lathe for small-part precision turning where accuracy and cycle time matter most. 8" OD × 12" L max turning.

HWACHEON

Bearkat Blur · high-speed precision CNC turning center

Bearkat Blur exists because certain oilfield and aerospace parts are small, high-quantity, and can't tolerate the setup time of a larger machine. Bushings, couplings, precision shafts, valve inserts, and any repeatable geometry in the 8-inch envelope — this machine cycles fast without giving up accuracy. When cycle time drives the quote, this is the machine that wins.

Pick your industry

Hwacheon Hi-Eco 21 HS for Oil & Gas

Full spec sheet, typical oil & gas parts, alloys, tolerance expectations, documentation approach.

Hwacheon Hi-Eco 21 HS for Aerospace

Full spec sheet, typical aerospace parts, alloys, tolerance expectations, documentation approach.

Hwacheon Hi-Eco 21 HS for Military & Defense

Full spec sheet, typical defense parts, alloys,

Hwacheon Hi-Eco 21 HS for Industrial & General Manufacturing

Full spec sheet, typical industrial parts, alloys,

tolerance expectations, documentation
approach.
