

UNISIG Deep-Hole Drilling Machine — Deep Hole

Precision gundrilling and BTA drilling for long, straight, tight-tolerance holes in oilfield and aerospace parts. Long-bore capability — high L/D ratios.

Deep Hole · gundrilling / BTA deep-hole drilling machine

Deep, straight, concentric holes are one of the hardest features to produce on any CNC platform without a purpose-built machine. Most job shops don't have one. Downhole tool bodies, valve stems with long bores, hydraulic cylinders, and any part that needs a straight bore longer than a few diameters routinely gets outsourced — or worse, made poorly on an inadequate setup. UNISIG deep-hole drilling is a genuine capability moat.

Pick your industry

UNISIG deep-hole drilling for Oil & Gas

Full spec sheet, typical oil & gas parts, alloys, tolerance expectations, documentation approach.

UNISIG deep-hole drilling for Aerospace

Full spec sheet, typical aerospace parts, alloys, tolerance expectations, documentation approach.

UNISIG deep-hole drilling for Military & Defense

Full spec sheet, typical defense parts, alloys,

UNISIG deep-hole drilling for Industrial & General Manufacturing

Full spec sheet, typical industrial parts, alloys,

tolerance expectations, documentation
approach.
